PROFESSIONAL SUMMARY

A hands-on technology leader with 15+ years of driving enterprise digital transformation through AI, Data, and Cloud. At Google Cloud's Professional Services Organization in Southeast Asia, I serve in dual roles:

- **Data Analytics Manager:** Spearheading the Data Analytics practice to architect innovative, data-driven solutions.
- **Site Lead:** Overseeing cross-practice engagements (AI, Data Analytics, Infrastructure, Application Modernization, Security) to ensure delivery governance, revenue growth, and operational excellence.

I excel in building high-performance teams, executing multi-million-dollar programs, and pioneering breakthrough frameworks—delivering measurable business impact across SEA and JAPAC.

IMPACT HIGHLIGHTS

- **\$20M+ Delivery Portfolio:** Managed 50+ enterprise-scale projects with 100% customer satisfaction, tight delivery variance, and proactive escalation management.
- **\$30M+ Business Impact:** Led cloud transformation initiatives that drive robust revenue growth and operational excellence.
- **Innovative Frameworks & Protocols:**
 - ARTEMIS: Published an adaptive multi-agent debate framework transforming real-time decision-making ([Link](#)).
 - Developed proprietary approaches for continuous context propagation and scalable workload discovery.
 - ETLC: Created a framework reimagining data platforms for the Generative AI era ([Link](#)).
 - OLP & OConsent: Engineered privacy-centric protocols for secure data sharing and transparent consent management.

PROFESSIONAL EXPERIENCE

Google Cloud – Professional Services Organization, Southeast Asia

2021 – Present

Data Analytics Manager | Site Lead, PSO Southeast Asia

- **Data Analytics Manager:**
 - Lead the Data Analytics practice to design and deploy innovative, business-driving solutions.
 - Collaborate with C-suite stakeholders to craft multi-year digital roadmaps aligned with strategic objectives.
- **Site Lead:**
 - Oversee cross-practice engagements spanning AI, Data Analytics, Infrastructure, Application Modernization, and Security.
 - Manage an \$11M+ delivery portfolio with 100% CSAT, minimal delivery variance, and effective escalation management.
 - Drive revenue growth and operational excellence across SEA & JAPAC through strategic delivery governance.

Standard Chartered Bank

2019 – 2021

Principal Engineer – Data & Analytics Transformation

- Led enterprise-wide modernization initiatives, influencing C-suite strategic decisions.
- Spearheaded projects integrating alternative data sources with advanced AI/ML models, significantly reducing deployment times.
- Developed scalable platforms that enhanced operational efficiency and delivered measurable business impact.

Think Big Analytics (a Teradata Company)

2017 – 2019

Principal Data Engineer / Solution Architect

- Architected petabyte-scale data processing platforms and real-time analytics solutions for Fortune 500 clients.
- Mentored engineering teams and established best practices in data architecture and cloud migration.
- Delivered high-performance solutions supporting critical business functions across APAC.

UTU

2016 – 2017

Technical Lead

- Led technology roadmaps and market entry strategies for mission-critical payment systems.
- Built and mentored teams to deliver high-performance integration solutions in fast-paced environments.

Additional roles from 2010 – 2016 in Software Engineering and Technical Consulting.

EDUCATION & CERTIFICATIONS

- M.Tech, **Software Systems** – BITS Pilani
- MBA, **Business Analytics** – BITS Pilani
- **Google Cloud Certifications:**
 - Professional Cloud Architect
 - Professional Data Engineer
 - Professional Machine Learning Engineer

KEY SKILLS

- **Leadership & Strategy:** Visionary technology planning, high-performance team building, C-suite engagement
- **Enterprise Architecture:** Designing robust, scalable data and AI infrastructures
- **Digital Transformation:** Executing complex cloud initiatives and multi-year digital roadmaps
- **Technical Expertise:** AI/ML, data analytics, cloud platforms (Google Cloud, AWS, Azure), distributed systems

INNOVATIONS & PUBLICATIONS

- **ARTEMIS:** Adaptive multi-agent debate framework for real-time decision-making ([Link](#))
- **ETLC Framework:** Reimagining data platforms for the Generative AI era ([Link](#))
- **Open Location Proof & Open Consent:** Privacy-centric protocols for secure data sharing and consent management. (olp-protocol.org), (oconsent.io)
- Additional proprietary frameworks for continuous context propagation and scalable workload discovery.
